

Contribution Selma

Selma — Contribution Statement

Primarily responsible for: exploratory analysis (`scripts/02_exploratory.R`), predictive modelling (`scripts/03_predictive.R`), proposal document (`project-proposal.qmd`)

- Designed and executed the exploratory analysis of alcohol-related accident seasonality, producing Figure 1 (seasonal line plot) and Table 1 (monthly share table)
- Built and evaluated the regression forecasting model using a linear trend and calendar-month dummies, producing Table 2 (coefficient table) and Figure 2 (predicted vs. actual plot with RMSE)
- Revised and consolidated the proposal document to meet the updated assignment requirements, including reducing the research questions to two and embedding the full analysis pipeline directly in the Quarto document

Collaborative tasks: workflow organisation, interpretation prose, data cleaning, final report assembly
